

添加剂

TEMAD ANTIUV

名称 TEMAD ANTIUV
品编 根据配方制作
类 抗紫外线添加剂

NAME: TEMAD ANTIUV
CODE: according to the formulation
TYPOLOGY UV STABILIZER

描述 该系列紫外线 定剂可以分为两大类：

- 紫外线 定剂
- 屏障效果的紫外线 定剂

前者旨在防止聚合物由于太阳光紫外线而降解。后者可以吸收紫外线，将其转变为热能，从而保护待实现的制成品。

PRODUCT
DESCRIPTION:

There are two major types of UV stabilizers:

- *UV stabilizers*
- *UV stabilizers with barrier effect*

The former have the purpose to protect polymers from the degradation caused by the sun's UV radiations. The latter have the purpose to absorb UV radiations and transform them into thermal energy, thereby protecting the contents of the articles to be manufactured.

使用方式:

TEMAD ANTIUV使用如下：使用百分比取决于光照下 定性，用Kly表达，还取决于制成品所在的地理位置。

警告：技术表内的数据基于我们当前的知识水平，其目的仅供参考。其无论如何（《民法》第1341-1342条）无法确保产品的具体属性以及特定用途下的合适性。买方独家负责确认技术表内所述特征以及成品的有效性。

WAY OF
USE:

TEMAD ANTIUV should be used as follows: The percentages of use of these products vary according to the requested stability to light, expressed in kly, and to their geographical area of exposure.

WARNING: The data shown in the technical data sheet are based on the current level of our knowledge and their purpose is purely indicative. They are not in any way intended to guarantee (Article 1341-1342 CC) specific properties of the product and its suitability for a given application. It is exclusive responsibility of the purchaser to verify the characteristics shown in the technical data sheet and their validity on the finished product.
