

添加剂

TEMAD DETEK TT

名称 **TEMAD DETEK TT**
品编 **根据配方制作**
类 **金属探测添加剂**

NAME: **TEMAD DETEK TT**
CODE: **according to the formulation**
TYPOLOGY **METAL DETECTING ADDITIVE**

描述 在食品加工和包装阶段探测异物对于安全、品质尤为重要，可以避免产品污染。Temad Detek TT通过均匀扩散以及和原材料的混合，可以起到作用，一旦加工或包装期间有塑料碎片出现在产品上，该制剂可以立即通过金属探测器予以识别。

Temad Detek TT用途广泛：可用于不同生产工艺内部（比如注塑冲压、挤压和吹塑），还可以和LDPE、HDPE、PP、PS和MABS等类型聚合物兼容。

PRODUCT DESCRIPTION: *The detection of foreign bodies during food processing and packaging phases plays a fundamental role in ensuring safety and quality, avoiding product contamination. The Temad Detek TT, dispersed homogeneously and mixed with the raw material, acts so that, if some fragment of plastic material ends up in the product during the processing or packaging phase, these would be immediately identified by a metal detector. Temad Detek TT is extremely versatile: it can be used in different production processes - such as injection molding, extrusion and blow molding - and it is compatible with various types of polymers, such as LDPE, HDPE, PP, PS and MABS.*

使用方式: 所需百分比是依据待识别颗粒的尺寸计算。保存在干燥、离热源的地方，采用密闭包装。

WAY OF USE: *The recommended use percentage may vary depending on the size of the particles need to be identified.*
