

添加剂

TEMAD LASERMARK

名称 TEMAD 激光打标
品编 根据配方制作
类 激光打标添加剂

NAME: **TEMAD LASERMARK**
CODE: **according to the formulation**
TYPOLOGY **LASER MARKING ADDITIVE**

描述 产品编号如今被视为生产工艺的一大重要环节。除了到期日，产品通常还要打上批号、实时生产日期、条形码或其他可变信息。

针对此类应用，我方隆重推介TEMAD 激光打标，这款添加剂可以让您给产品激光打标。

激光打标的原理就是通过化学反应，改变被激光照射的材料颜色。该实践已经普遍，有助于更具需要“跟踪”产品，向消费者保证了购买时的安全衡量体系，让生产者轻易识别不合格的生产批次。

除此以外，相比其他编号系统还有一系列优势。首先就是经济优势，由于不存在易耗材料和维护材料，停机时间大幅缩减，而环保性、在多层次和材料上的可用性也值得称道。

PRODUCT DESCRIPTION:

Product coding is today considered an integral part of the production process. In addition to the expiration date, the products shows lot numbers, real-time production date, barcodes or other information. For this kind of application we present TEMAD LASERMARK, the additive allows you making your products laser-markable. Laser marking is based on a chemical reaction able to modify the color of the material hit by the laser beam. This practice makes it possible to "trace" the product according to the needs, guaranteeing the consumer a safety measurement system in the purchase and the manufacturer a simple identification of any non-compliant production batches. It also has a number of advantages compared to other coding systems. First and foremost the economic one, for the absence of consumables and maintenance that leads to considerable decrease in downtime, as well as the positive aspects deriving from full environmental compatibility and the possibility of being used on many substrates and materials.

使用方式: 推荐用量百分比取决于制成品和生产工艺内的激光类型。产品怕潮：保存在干燥、离热源的地方，采用密闭包装。

WAY OF USE:

The recommended use percentage may vary depending on the product and the type of laser beam used in the production process. Keep the product in a dry place, away from heat sources and use airtight packaging.
